About Mektal

Short story about us.

MEKTAL was founded in 1957 in Gdańsk, Poland as family based company. Since 1997 Mektal is located in Puck, 40 km from Gdańsk.

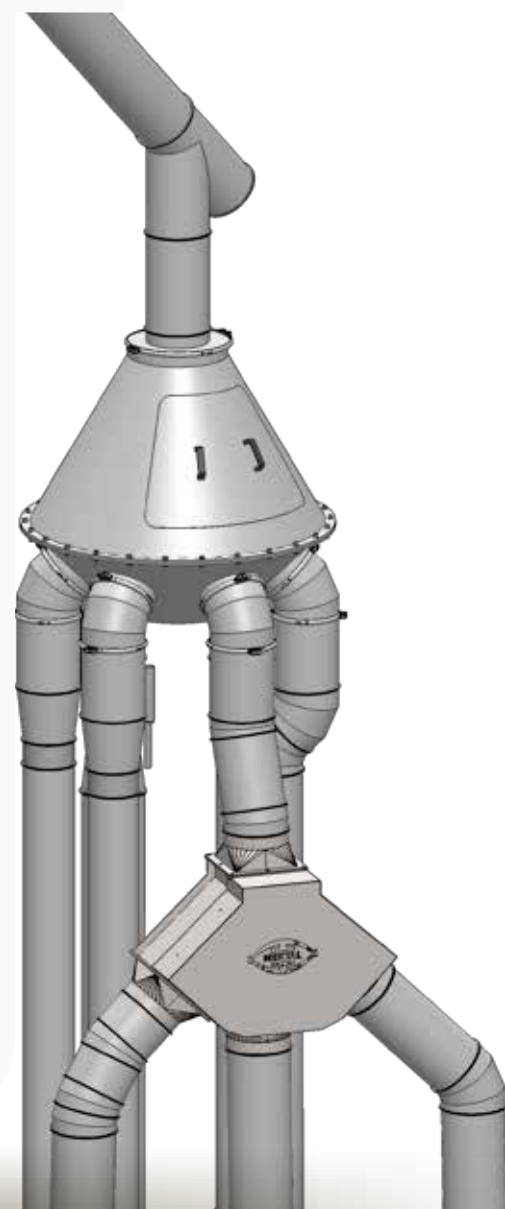

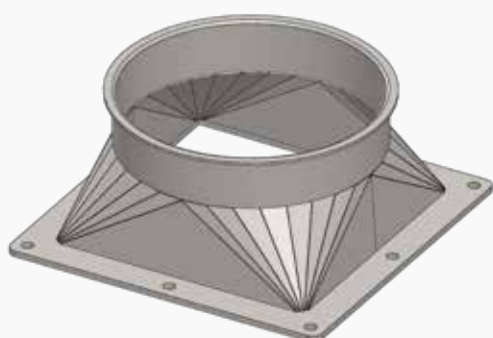

Main specialization of the company is design and production of solutions for gravitational, pneumatic, low-pressure and mechanical transport.

Ready to work.

Grain and feed transport

Mektal offers a system of modular pipelines connected with special clamps. The offer, apart from pipes, includes many devices, fittings and services, thanks to which transport becomes simple, quick and cheap to maintain and work.

Mektal modular pipelines have main advantage apart from warehouse, production capacity ready to work.

Transport experienced

Gravitational and pneumatic transport

In Mektal, we also manufacture self-supporting, modular, bolted and special tanks. We provide the service of designing and manufacturing tanks for hard-to-flow or clumping materials.

We have designed, created and produced many static and mechanical solutions for clumping materials in tanks cones and sheatings.

The biggest experience in storage for:

Grain

Animal feed

Concentrate feed

Bran

Soda

Silicon dioxide

Quicklime

Basalt flour

Cement

Chalk

Titanium dioxide

Slaked lime
